USC Alum

SPRING 1975

A Quarter's Worth

If You're A WSC Alumnus, You're Probably Working

According to statistics released by the college Placement Bureau, 90% of WSC's graduates from 1971 to 1974 obtained jobs within four months after graduation. The statistics also show that the overwhelming majority of B.A. graduates went into business and industry, while most B.S. graduates continue to find employment in education.

Beyond those 90% who found employment soon after graduation, another 7% found jobs within a year, leaving only 3% of the grads unemployed.

Business and industry captured a lion's share of our B.A. degree holders: a total of 81%, while 6.9% went into social service and 6.3% went into education. The few remaining B.A. graduates entered government, military or technical service.

The B.S. degree holders were almost as partial to education as their B.A. brethren were to business and industry. However, 14.4% became nurses, a profession that has become very popular in recent years, and 11.7% broke ranks and joined the B.A. grads in the business world. Others pursued careers in domestic, military, government and technical services.

The two safe, though not profound, conclusions these figures suggest: 1) WSC grads strongly favor careers in business and education; 2) a WSC grad has a very good chance of finding a job.

Whatever Happened To Bill?

Davidson College, Davidson, N.C. recently was embarrassed to discover that one of its most distinguished graduates, Bill Edwards, doesn't exist—and never has.

It seems members of the class of 1953 have perpetuated a hoax over the years. They invented Bill and then skillfully and ingeniously fed the college news of his sometimes daring, sometimes humanitarian, always spectacular deeds. From

pioneering in real estate development in New Jersey to leading scientific research projects in Singapore, Bill's legend grew in the Davidson alumni bulletin. After his mysterious death in 1973 while investigating a drug ring, Bill's name and image were enshrined in a memorial at the college.

At first this incredible yarn struck us as humorous. However . . . well, it couldn't happen here!?

Correction

In the Winter issue we listed JoAnn Margaret Blakstad Hoven, '68, as deceased. We subsequently received a letter from her assuring us that she is "very much alive". We apologize to Mrs. Hoven and all who know her for this error. Our embarrassment is compounded by the fact that this was the second time in as many issues that we have made an error in our list of deceased alumni. Hopefully, we now have that out of our system. —Editor

Summer Bulletins Available

The 1975 Summer Bulletin was published in March and is available upon request. A noteworthy cost change: on-campus students will now pay fees at the rate of \$2.25 per credit, with an \$18.00 maximum per session. This replaces the old system of a single fee for all part-time students and another for full-time students. For information and/or a bulletin write: Director of Summer Sessions, Winona State College, Winona, MN, 55987.

The WSC Alum is a publication of Winona State College. It is published for alumni and friends of the college in an effort to keep them aware of progress and news on the campus and to help them maintain contact with one another.

Comments from the Director

by Ray Amundson

Lake City Alumni Reunion

On March 1st we visited with our alumni at a social reunion in Lake City, Minnesota. Our evening consisted of a dinner with a social hour following, filled with conversation and reminiscence. The alumni attending the dinner were unaware of our format, which is based on just getting to know each other. We emphasize a friendly atmosphere with no speeches or pitches. Of course, if you ask us about WSC and can spread a good word about us, we will be glad to talk to you. We hope in the future when you are invited to your area dinner that you will attend knowing that these alumni dinners are based on having a good time.

Alumni Society By-Laws Amended

The Board of Directors of the Alumni Society have amended the By-Laws. One of the amendments includes the change of the alumni lifetime membership fee to twenty dollars (\$20.00). For you to obtain a better understanding of the Society, the By-Laws will be published in the summer issue of the ALUM.

Guess Who Pictures

We have identified nearly everyone in pictures 14, 15, 16, and 17 published in the Spring '74 ALUM. There are some that we don't have addresses for, so if anyone knows of their whereabouts we sure appreciate a note letting us know of a current address. Also if we have made any errors, please correct us.

Picture No. 14: Technicians of the Wenonah Players' spring production of "Everyman" in the 1947 annual. From left to right, row one: Barbara Swendiman Anderson, attended '46-47, 735 Linden Street, East Lansing, Michigan; Jean Jederman, B.S. Education, '49, 865 Wing Street, Elgin, Illinois; Bonnie Utley Austin, B.S. Elementary Education, '49,

Route 2, Northfield, Minnesota; Barbara Nuszloch Culhane, Diploma, '48, B.S. Elementary Education, '67, 200 East Jessie, Rushford, Minnesota; Edna Pell Betker, B.S. History, '49, 3105 Hillcrest Avenue, Orange, California; row two, Jean Wallace Tegfeldt, attended '46-47, 154 South Sylvester Road, San Diego, California; Charles Harvey Keith, B.S. Industrial Arts, '49, no current address; row three, Robert Goldstein, attended '46-48, 510 East Community Place, Milwaukee, Wisconsin; Wilbur L. Quickstad, B.S. Social Science, '48, no current address; William Mahlke, B.S. Social Science & History, '48, Pine Island, Minnesota; Donald E. Rice, attended '46-47, 300 West Caledonia, Caledonia, Minnesota; Deleon C. Austin, B.S. Industrial Art & Art, '49, Route 2, Northfield, Minnesota.

WSC's High School Relations Program

by Dr. James Mootz
Director of Admissions and Counseling

Winona State College, like all other institutions of higher education, is competing for new students. Although WSC has been the only 4-year state college in Minnesota to show an increase in enrollment for the past two years, the college continues to explore new approaches for our recruitment or high school relations program.

Beginning with the new fiscal year, July 1, 1974, the WSC administration, at the request of the Functions and Planning Committee, created a separate Admissions Office. For the alumni, this is a change from a combined Registrar-Admission Office. Dr. James Mootz, Director of the Student Counseling Center for the past five years, was appointed Director of Admissions and Counseling. The Admissions Office has responsibility in the following areas: informational services, high school relations, admission of new students, transfer evaluation, returning students, Veteran Affairs, tours, and public relations.

The admissions staff includes Mr. Charles Bentley, Mr. Harold Tye, and Miss Janie Gordon. I am sure recently graduated alumni are familiar with Chuck and Art. Miss Gordon is a new addition to the staff this past fall, and has traveled many miles to talk with prospective students. We have one other person spending the months of January, February, and March with our office to assist in the follow-up contacts. The secretarial services are provided by four very hard working and effective secretaries. Without their extra endeavors, many of our projects would not be possible. The staff certainly appreciates their efforts. As you can tell by the above information, the Admissions Office has grown in staff and secretarial positions. Also, the budget provided by the administration and the faculty has increased to permit the admission area to experiment with some new approaches in reaching prospective students.

Another point of information for alumni—The Admissions Office is now located in Phelps. Yes, that's right, the old laboratory school, where some of you probably attended classes or student taught. The Admissions Office occupies the first floor and when you return to campus, we invite you to stop by for a cup of coffee. We even have guest parking

in the old playground area for VIP's—here at WSC, VIP's include prospective students and their parents and alumni.

The Winona State College recruiting approach has many facets from direct contact, to mass mailings, to information about WSC on communications media. Early in September, each college receives a list of all seniors in the state of Minnesota, along with their address, high school rank, test scores, and plans after high school. Each senior student indicating an interest in WSC receives a letter and appropriate material. Also, this fall, WSC had three to four admissions officers traveling each week. We attended about 50 college night programs in Minnesota and 12 in Wisconsin, which resulted in approximately 2,400 personal contacts with prospective students. Around these college night programs, we visited area high schools during the day, which involved over 12,000 miles of traveling. During the months of November and December all high schools in our immediate service area were visited, and we return in late February and March for a personal follow-up with each student.

From January through March, the Admissions staff attempts to again visit with each prospective student and applicant on our contact list, a list that includes all students who have indicated an interest in WSC through the State-Wide Testing Program, college night programs, day visitations, test scores, letters, calls, or campus visits. With the reciprocity agreement that permits Wisconsin students to attend WSC at resident tuition rates, we are making greater efforts to inform Wisconsinites about WSC and its curriculum. Also, three extended trips to Chicago are planned. We will contact over 80 high schools and have a reception for these students and their parents at the end of each week. We have written to all alumni in the Chicago area and encouraged their support of their alma mater and invited them to participate in the reception.

Another program to seek the support of WSC alumni is just beginning. We would like to identify alumni in each city that would be willing to act as a liaison between prospective students and the college. This person might visit with potential candidates about WSC and provide appropriate literature. As you read

your "Alum" magazine, and follow what's happening on campus, if you are interested in becoming involved, please contact Dr. Mootz.

This year there has been more material available to each prospective WSC student than ever before. There are many letters and phone calls exchanged each day, and each time we visit with a student some new items of information can be shared. In January, an information sheet, "Winona State's—it all" and a metric conversion scale were sent to each student. In February, we direct mailed a newsletter and hopefully, in March, we can forward to all students a copy of the school paper "Winonan" with a special insert on student life.

Winona State is interested in many types of students; such as the transfer student, the vocational student, the veteran, the minority student, the international student, and the older adult desiring to obtain a college education. Along these lines, we get involved in the following ways:

1. Transfer student—We will visit with all the community colleges in the area numerous times this year and other community colleges in Northern Minnesota will be contacted once. A "Community College Counselors Day" will be held on campus.
 2. Vocational Student—At the present time, WSC has two approved programs that will permit acceptance of vocational school credit (Vocational Education and Business Education). The Admissions Office assists these young people in making the transition to a four-year college.
 3. Veterans—Information about WSC is sent to all discharged veterans in our service area. A Veteran Representative on campus is located in the Admissions Office to assist the veteran.
 4. Minority Student—The Admissions Office supports the Black Student Union in reaching potential students. WSC will participate in a "National Scholarship Service and Fund for Negro Students"—College-Student—College-College Interview Session on March 8, 1975.
 5. International Student—The Director of International Students and the Admissions Office work closely together to encourage foreign students to attend WSC.
 6. External Studies Program—To assist adults who cannot attend regularly scheduled daytime classes, yet wish to work toward a college degree, the Admissions Office and the External Studies Program work cooperatively toward assisting this group.
- Other highlights from the Admissions

Office that occupy our time when we are not traveling:

Movie—WSC has developed a 16mm color/sound movie depicting the college and the community. An excellent presentation about the curriculum and life on campus.

Collect calls—The Admissions Office may now accept collect calls (507/457-2065). This is a valuable assistance in relating to specific questions that some students may have about WSC.

Tours—The Admissions Office offers tours each weekday at 11:00 a.m. and at other times as requested. The Admissions Office is open every Saturday morning from 9:00 to 12:00 for tours and information. Arrangements can be made for overnight lodging in the residence halls.

Open House—The Admissions Office sponsors two open house programs during the year. The first is scheduled at teacher convention time and the other in the spring.

Scholarships—Winona State this year is making an attempt to award Honor Scholarships to students who have demonstrated special academic talent in high school.

Application—Students who take the ACT can now be admitted without submitting an application or high school transcript.

Advance Placement—College credit is now granted for satisfactory scores on the CLEP, Advanced Placement exams of CLEP and Departmental exams.

Parents Day—Summer Pre-Registration—The Student Affairs Office sponsors a dual program in the summer for accepted students and their parents. Students select the fall classes with top priority in the college while parents are informed about services at the college.

As you can see, many different things are happening in college admissions at WSC. All of this comes together after fall registration, and we begin the sequence again for the following year. Admissions staff members are dedicated and enthusiastic; however, too often the Admissions Office has been perceived simply as persons making the rounds to college nights and calling on as many high schools as possible. Instead, I feel we should be the manager of a major program designed to coordinate the college's entire resources in a concerted effort to bring to the college the numbers and kinds of students who will benefit from the college and will benefit the college itself by their presence.

Finally, when promoting WSC, we must remember that the student essentially wants to learn what life will be like for the next four years. The physical plant and environment are important; however, defining the life-style of WSC students is

of prime interest to potential students. Recruiters, school catalogs and other communication about the college must strive to help students imagine themselves on the campus.

Alumni and Recruiting

When the typical high school senior faces the perplexing question of which college or university to attend, who is the person who may have a large influence? Surprisingly—or perhaps not—it may be you, the alumni.

At a time of declining or “steady-state” enrollments, colleges across the country have been seriously studying what or who may have the greatest effect on how prospective students choose their college. The results are pretty clear. Reasons cited most often indicate that students chose the college they are attending upon the advice of students who are also attending the institution or alumni.

Indeed, the influence of alumni ranks very high when compared to other individuals assisting young people in choosing a college.

Colleges, including Winona State, have known for a long time, of course, that there are students on the campus because of kind words alumni have said about their alma mater. But the whole idea has suddenly taken on a new importance. A few years ago enrollment problems were not critical; colleges were so full they didn't have room for all the applicants.

Since then, a number of factors have changed. There is no longer the large crop of students born during the post-World War II “baby-boom.” The United States is no longer in the Vietnam War and the draft is ended; consequently, the attempts by young men to get into college to avoid the draft have ceased. Also, the job market for college graduates is less promising than it used to be.

We at Winona State College are in a somewhat more enviable position than many institutions around us, since we did have an enrollment increase this past year.

We recognize that this increase is due, in part, to the help we are getting from you, our alumni, and we are anxious to expand opportunities for this valuable assistance. An even larger involvement of alumni in student recruitment is going to be needed.

We hope alumni in every area of the country—not just Minnesota—will be willing to spot prospective students for the college. A call from an alumnus shows students that someone really cares about them.

A few weeks ago, a WSC alumnus from a city near Minneapolis brought a group of prospective students to Winona. She didn't send them, she brought them, and this wasn't the first time she had made the trip with high school seniors. The alumnus notifies the Admissions Office about the upcoming campus visitation and makes sure that we provide our guests with a tour and more information about WSC.

Incidents like this can be multiplied many times. Whether you realize it or not, you probably occupy a special place in your community, particularly in the eyes of these young people. We can talk to prospective students about how they may achieve success after they earn a college degree, but alumni are actual examples. They provide a different perspective and often parents are as happy as students to be contacted by alumni.

Partly because of the current economic squeeze, students are much more concerned about career planning than they have been in the past. Here is an area where conversations with alumni can be especially helpful.

Many colleges and universities, particularly private institutions, are making an all-out effort to involve their alumni in the recruitment of new students. Winona State College has always enjoyed a good relationship with the alumni and would like to urge greater involvement in the area of recruitment.

Here is a new opportunity to demonstrate your loyalty in a way that can be most helpful—to us and to young students. Alumni who have been working with us have found involvement in student recruiting to be a very interesting and rewarding experience.

How about you? You can begin by filling out the referral coupon on this page. We will appreciate it.

ALUMNI AND PARENTS CAN HELP WSC LOCATE NEW STUDENTS

Alumni and parents are asked to fill in the coupon to the right if they know of a prospective college student who might be a candidate for admission to Winona State College.

(optional)

The Intramural Program at Winona State College is guided by a faculty member appointed as Director of Intramurals and by selected members of the student body. Participation, ranking among the highest in the State of Minnesota, approaches sixty percent of the student body.

The Student Activities Fund provides financial support for intramurals, with over eighty-five percent of this money returned to the students in the form of salaries for officiating, supervising, and other duties.

Excellent indoor and outdoor facilities offer year-round organized and free-play intramural activities. Two modern gymnasiums provide areas for basketball, badminton, tennis, indoor soccer, volleyball, and gymnastics. Five modern racquet-handball courts, a weight training room, wrestling room, and swimming pool provide a complete exercise and recreation facility for student use. Outdoor tennis courts, football and soccer fields, hiking, cross country and jogging trails permit a great variety of leisure, free-play opportunities.

Both men and women fervently support the program. Organized activities popular with the men are flag football (30 teams), basketball (50 teams), broomball (20 teams), softball (40 teams), racquetball and wrestling. Ice hockey will become a "regular" for the first time in the 1975-76 year. The women participate in basketball (20 teams), volleyball (70 teams), touch football (20 teams), slo-pitch softball (50 teams), gymnastics and racquetball. In addition the guys and gals get together for co-recreational volleyball, broomball, racquetball and swimming.

The program fulfills the interests of both dormitory and off-campus students, promoting as much participation from the student body as possible.

Intramurals at WSC

From left to right, Representatives Richard Lemke, Al Wieser, Mac McCauley, and Senator Roger Laufenburger examine legislative papers which will become part of their collections in the Center.

Southeast Minnesota Historical Center

A Cooperative Venture in Promoting Regional History

by Dr. George E. Bates, Jr.

This fall the College and the Minnesota Historical Society established the Southeast Minnesota Historical Center on campus. Dr. George E. Bates, Jr., WSC history department, directs Center operations from offices in Maxwell Library. While the Historical Society extends considerable assistance in such diverse forms as equipment and training, the College lends its physical facilities and personnel. Together they offer an academic and professional atmosphere for promoting regional history.

Connected informally with six other state regional centers, the Southeast Center autonomously fosters the study of history in the eight southeastern Minnesota counties. Basically an archive, it houses a wide variety of documents on regional history, both public and private, such as business records, ledgers, account books, personal papers, diaries, correspondence, notebooks, architect's plans and drawings, maps, land plats, surveys,

pamphlets and photographs.

Some very significant collections, such as, the College archives, are located in the Center. Since WSC is the oldest state college west of the Mississippi, its archive materials reflect the region's broad cultural and intellectual life. Several past and present state legislators have already donated their papers, and it is expected that Winona will become the major depository for southeast Minnesota's historic political documents. The region's diverse economic life—agriculture, lumbering, industry, transportation, and business—is represented in materials related to milling, railroads, and farming. Cemetery association records and several other collections reveal a wealth of extraordinarily valuable information for demographic analysis, the study of populations.

Dr. Bates actively seeks to expand the Center's collections. Old family records and letters are naturally treasured, but the best safeguard against damage is to donate them to the Center for preservation.

Businesses with significant historical roots also find distinct advantages in donating their records, for storage and handling costs are eliminated and retrieval is simple.

Preservation and storage go hand in hand with collection, and begin the moment materials are received. First, the collection is unpacked and temporarily placed in boxes and folders designed to protect them. Next, each item is carefully examined, sorted, organized, and if necessary, cleaned and repaired. Materials are then filed under tentative divisions suggested by the nature of the collection. When these prove to be advantageous, they become permanent, and classification is completed. The final step is writing the inventory describing the collection's background and contents.

The Center makes source materials available to students to foster the study of regional history. During the school year, the Center is open daily to all, subject only to normal noncirculating library regulations and restrictions made by donors. Hours of operation vary, and patrons should contact the director in advance.

The Center supports the study of regional history for all ages and groups. Tours and talks about Minnesota history can be arranged for school children through the director. The Center is firmly committed to community service and works in close cooperation with local historical organizations.

Much of the Center's promotion of history involves curriculum development within the College. The Center actively attempts to expand student career opportunities into history-related fields: archive management, museum work, and archaeology. Cooperating with local societies, it has sponsored internships giving students on-the-job training to gain self-confidence. These have been so successful that discussions are underway to establish more extensive programs.

New course offerings are also being developed. Next fall, the history department plans to offer a course in oral history techniques. Oral history is the preservation of source materials through carefully planned taped interviews. As the Center's demographic collections increase, unique courses will be offered introducing teachers to demographic and quantitative historical techniques which add new dimensions to teaching history at the secondary level.

Thus, the Southeast Minnesota Historical Center represents new approaches in the promotion of history. While the scope of its activities embraces diverse autonomous organizations, its origin and emphasis is essentially based in cooperation between equals. The next time you visit our campus, plan to spend a few minutes at the Center.

Galligan Memorial Award

Two Memorial Awards have been established at Winona State to Dr. Glen E. Galligan, former coach, Athletic Director, and chairman of the Department of Health, Physical Education, and Recreation. One award will be presented to the player and to his home school. The Glen E. Galligan Professional Development Award will be given to a WSC junior or senior major selected on the basis of outstanding achievement in citizenship, leadership, scholarship, and aptitude in health, physical education, and recreation studies. This award will help an outstanding student to attend professional meetings.

Dr. Galligan graduated from Everett High School, Washington, in 1916; from the Everett Junior College in 1917; and earned his bachelors degree in 1922 from the University of Washington Teachers College, Seattle. During all his undergraduate years, he was active in football,

baseball, and basketball. He received his masters degree from Columbia University, New York in 1926 and his Ed. D. degree in 1937 from New York University.

For a time he taught physical education and coached athletics at Union High School, Sedro Woolley, Washington, and was assistant athletic director of the Scarsdale Public Schools, New York.

He joined the staff of Winona State Teachers College in 1927 and was instrumental in developing the physical education department. During his tenure at Winona, he not only coached winning football, basketball, and baseball teams but introduced intramural sports such as soccer, volleyball, kittenball and even horseshoe pitching to the physical education program.

As one of the leading figures in Minnesota college athletics and coaching circles, Dr. Galligan served as vice-president of the Southeastern Minnesota Education Association and as president of the Minnesota Teachers College Coaches Association.

While in Winona, he was a member of the Winona Recreation Board, president of the Kiwanis Club and commander of the Leon J. Wetzel Post of the American Legion.

Dr. Galligan left Winona in 1948 to become professor of Physical Education at Washington State University, where he retired in 1965. He died in 1972.

Dr. Galligan's wife, Freda, resides in Friday Harbor, Washington; his son, William, resides in Madison, Wisconsin; and his daughter, Mrs. Patricia Opalsky, resides in Benton Harbor, Michigan.

Mrs. Glen E. Galligan presents a \$1,000.00 Memorial Award check to Winona State College.

Left to right: Eddie Spencer (former player on Dr. Galligan's teams); Dr. Dwight H. Marston, Director of Athletics Winona State College; Mrs. Glen E. Galligan, Bill Galligan (son) and Mr. Glenn E. Fishbaugher (personal friend and colleague of Dr. Galligan at Winona State College).

Dr. Galligan

The Paralegal Program

by Robert W. Meinhard
Head, Department of History

On January 8, 1975, Chancellor G. Theodore Mitau and State College Board member Orrin Rinke participated in ceremonies inaugurating a new and innovative program at Winona State College: the B.A. Paralegal major. One of the first, if not the first, of its kind in the nation, it prepares students for a variety of careers in law, government and business.

Roderick Henry, WSC History Department, and Duane Peterson, senior member of the law firm of Peterson, Delano and Thompson, conceived the program. Then the three departments involved cooperated in tentatively developing it. Leaders in law, banking, insurance, industry, government, law enforcement and welfare services evaluated and subsequently unanimously and enthusiastically endorsed it. With support from the chancellor's office, it was then approved by the State College Board and Higher Education Coordinating Commission.

The program is now fully implemented. Several of the approximately sixty students enrolled have advanced standing and will graduate from the program during

the 1975-76 academic year.

An interdisciplinary program involving the departments of history, sociology and business administration, it enables students to develop para-professional skills in the legal services field. It is not designed to prepare students for law school, but it prepares them for occupational service to people and institutions that must deal with local, state and federal laws and regulations. It accomplishes this through four phases of learning: 1) general education, 2) interdisciplinary foundations, 3) foundations of law, and 4) professional specialization. The capstone of phase four is a one-quarter internship with a law firm, business or government agency.

Presently the program offers three options: Business Administration, Social Welfare services and multi-legal services. Before entering phase two of the program, the student selects one of these areas, depending upon his chosen area of future employment. For social welfare or law enforcement, he selects the sociology option; for banking and insurance, the business administration option; and for law office legal assistant, the multi-legal

option. Furthermore, he may choose to acquire a double major: Paralegal and Sociology or Business Administration. We are also developing a fourth option: legal investigator. Another growing field of employment, investigators work for law firms and business and an increasing number are self-employed. We are working with the National Association of Legal Investigators and hope they will certify the program.

The paralegal major gives students a breadth education, competence in written and oral expression and knowledge and understanding of our institutions, value systems and human relationships. Students further receive in-depth instruction in business, social institutions or a combination of business administration and sociology. They learn the rudiments of the American legal system, basic legal research, principals of proof of evidence, civil and criminal procedure in the American adversary system and learn how to apply this knowledge to practical problems.

Such knowledge is valuable to employers, as almost all government agencies and businesses must deal with the law through regulatory agencies and/or the courts. The graduate may serve as liaison between company and regulatory agency, between government agency and the courts, or in some cases between the company and its lawyers.

We are confident the program will open many doors to employment for graduates. We are not just training law office legal assistants. The multi-legal option provides the background and skills necessary for a wide variety of jobs in business, law and social service. Both the sociology and business administration options also offer this plus the added bonus of background and skills in law. Some of the jobs open to graduates are: legal assistant in a law office, police detective, police administrator, parole and probation officer, social worker, court administrator, arbitrator, legal assistant to government agency, administrative assistant to a city manager, trust officer in a bank, real estate salesman, legal investigator, legislative research, insurance writer or adjuster and business administrator.

For admission to the program; a student must be in the upper 50% of his high school graduating class or score 20 or above on the ACT test. The program is rigorous, with standards in the professional sequence aimed at providing excellence in our graduates.

For further information, write or call Mr. Roderick Henry, Coordinator of the program, or Dr. Robert W. Meinhard, Head, Department of History, Winona State College; or contact the Sociology or the Business Administration departments.

Things We've Heard About You

Classes of 1901 - 1930

Mabel Noel Coddington, Diploma, '11, lives in Midland Manor Nursing Home, Nampa, Idaho. She taught from 1911 to 1960. She received her masters degree from the University of Chicago.

Gladys Putsch Butler, Diploma, '14, and her husband, a veterinarian, live at Pompano Beach, Florida. Her daughter, Becky, is a graduate of Carleton College, Northfield, Minnesota.
